Develop the Finger Independence to Blend Alternating Bass Lines, Chord and Melodies

Fingerstyle blues is a deceptively demanding genre. The engine that drives the music is the 1/4 note alternating or static bass line played with the thumb. This technique is mastered first before melody and then chords are introduced on top. Every technical exercise is introduced via a musical

example or phrase that will naturally become part of your playing.

Musical Techniques

Fingerstyle Blues Guitar builds technique and independence through musical phrases and licks, so you will learn to develop the essential syncopation, legato, slides, slurs and vibrato required to play great blues naturally, and make them an unconscious part of your playing. The idea throughout is to build creative freedom so that you can always play what you hear. Of course, there are complete musical studies for you to learn, however, the focus is on building a technical understanding of the style allowing you to create and improvise your own ideas, just like the Delta masters.

The technique you develop through musical vocabulary in Part One of the book is then applied to the essential chords and approaches of the Delta style. You will learn finger-picking patterns, alternate bass lines, chord progressions and turnarounds, and understand how to blend these features together with improvised melodies to build authentic, unaccompanied blues guitar song.
