Microsoft PowerPoint has for many years been the premier slide show presentation software that is developed by Microsoft but for use on Apple or Microsoft machines. PowerPoint is quite useful in creating presentations that are slide based and is the commonly used software for this kind of development. The main interface of this system consists of number of individual pages otherwise called slides. This was originally related to a slide projector. This “slide” can contain graphics, texts, movies, sounds and other objects that can be arranged freely based on the user’s requirements. The presentations can be printed, displayed on a computer screen or it can be controlled by a presenter.
