NEW YORK TIMES BESTSELLER • From the bestselling author of *Dark Matter* and the *Wayward Pines* trilogy comes a relentless thriller about time, identity, and memory—his most mind-boggling, irresistible work to date, and the inspiration for *Shondaland*'s upcoming Netflix film.

“A time-twisting, mind-bending novel, perfect for summer reading.”—*The New York Times Book Review*

Memory makes reality. That's what New York City cop Barry Sutton is learning as he investigates the devastating phenomenon the media has dubbed False Memory Syndrome—a mysterious affliction that drives its victims mad with memories of a life they never lived.

Neuroscientist Helena Smith already understands the power of memory. It's why she's dedicated her life to creating a technology that will let us preserve our most precious moments of our pasts. If she succeeds, anyone will be able to re-experience a first kiss, the birth of a child, the final moment with a dying parent.

As Barry searches for the truth, he comes face-to-face with an opponent more terrifying than any disease—a force that attacks not just our minds but the very fabric of the past. And as its effects begin to unmake the world as we know it, only he and Helena, working together, will stand a chance at defeating it.

But how can they make a stand when reality itself is shifting and crumbling all around them?
