OLIVER SACKS

The Man Who Mistook His Wife for a Hat

“Dr. P was a musician of distinction, well-known for many years as a singer, and then, at the local School of Music, as a teacher. It was here, in relation to his students, that certain strange...”

THE MAN WHO MISTOOK HIS WIFE FOR A HAT brings together twenty-four of Oliver Sacks' most fascinating and beloved case studies. The patients in these pages are confronted with almost inconceivably strange neurological disorders; in Sacks' telling, their stories are a profound testament to the adaptability of the human brain and the resilience of the human spirit.

Dr. Sacks treats each of his subjects—the amnesic fifty-year-old man who believes himself to be a young sailor in the Navy, the “disembodied” woman whose limbs have become alien to her, and of course the famous man who mistook his wife for a hat—with a deep respect for the unique individual living beneath the disorder. These tales inspire awe and empathy, allowing the reader to enter the uncanny worlds of those with autism, Alzheimer's, Tourette's syndrome, and other unfathomable neurological conditions.

“One of the great clinical writers of the 20th century” (The New York Times), Dr. Sacks brings to vivid life some of the most fundamental questions about identity and the human

mind.
