Discover more than 85 of the most important mathematical ideas, theorems, and proofs ever devised, and the great minds behind them, with this original and colorful book. Take a journey through the fascinating story of fractions, numbers, patterns, and shapes in order to better understand the complex world we live in.

Continuing the "Big Ideas" series' trademark combination of authoritative, clear text and bold graphics to chart the development of math through history, the book explores and explains some of the most complex and fascinating mathematical subjects. Delve into everything from the mathematical ideas and inventions of the ancient world such as the first number systems, magic squares, and the Chinese abacus, through to the developments in mathematics during medieval and Renaissance Europe, to the rise of group theory

and cryptography more recently.

This diverse and inclusive account of mathematics will have something for everybody: for those interested in the maths behind world economies, secret spies, modern technology and plenty more, taking readers around the world from Babylon to Bletchley Park. Tracing maths through the Scientific Revolution to its 21st-century use in computers, the internet, and AI, **The Math Book** uses an innovative visual approach to make the subject accessible to everyone, casual readers and students alike.
