JULIAN JAYNES

THE ORIGIN OF
CONSCIOUSNESS
IN THE BREAK
DOWN OF THE
BICAMERAL MIND

HARVARD BOOKS

At the heart of this classic, seminal book is Julian Jaynes's still-controversial thesis that human consciousness did not begin far back in animal evolution but instead is a learned process that came about only three thousand years ago and is still developing. The implications of this revolutionary scientific paradigm extend into virtually every aspect of our psychology, our history and culture, our religion -- and indeed our future.
