For the millions of Americans who want spirituality without religion, Sam Harris's latest *New York Times* bestseller is a guide to meditation as a rational practice informed by neuroscience and psychology.

From Sam Harris, neuroscientist and author of numerous *New York Times* bestselling books, *Waking Up* is for the twenty percent of Americans who follow no religion but who suspect that important truths can be found in the experiences of such figures as Jesus, the Buddha, Lao Tzu, Rumi, and the other saints and sages of history. Throughout this book, Harris argues that there is more to understanding reality than science and secular culture generally allow, and that how we pay attention to the present moment largely determines the quality of our lives.

Waking Up is part memoir and part exploration of the scientific underpinnings of spirituality. No other book marries contemplative wisdom and modern science in this way, and no author other than Sam Harris—a scientist, philosopher, and

famous skeptic—could write it.
